

To the Conservation Commission, State of New York,
RESOLUTION and PETITION submitted by the EAGLE LAKE PROPERTY
OWNERS' ASSOCIATION, dated August 23d 1941.

WHEREAS:-

In about the year 1916 Mess. I.C. Newton and
~~Mortimer Y. Ferris~~, having purchased the land
at the outlet of Eagle Lake, Essex County, New York,
whereupon they removed the spillway-dam which was
constructed for the preservation & conservation of
the predatory fish that inhabited the lake and for the
purpose of holding the water-level at a proper
height to maintain the spawning beds, and

WHEREAS:-

Several years thereafter some one from Ticonderoga,
having filed an application for the planting of
white fish in Eagle Lake--which application was
rejected by the Conservation Commission as it was
considered by them that white fish were not proper
species for this water and this party, subsequently,
having having obtained a supply of white fish on
another application filed for some other water and
then, clandestinely, planted a large supply of these
white fish in Eagle Lake, contrary to the orders
and regulations of the Conservation Commission, and

WHEREAS:-

By virtue of the above recited conditions, both in
the destruction of the spillway and the planting of
white fish, the good fishing in Eagle Lake has been
severely harmed so that the natives of Ticonderoga
and its surrounding territory are being deprived of
the former fine fishing in this water, and

WHEREAS-

the Community who own cottages on Eagle Lake feel
it is within the province and the duty of the
Conservation Commission of the State of New York
to protect, conserve and maintain the predatory
fish in this water,

THEREFORE

BE IT RESOLVED:-

that the Conservation Commission of the State of
New York make a proper investigation of the now
existing conditions in Eagle Lake and reconstruct
the spillway-dam at its outlet to a height agreed
upon by the cottage owners and thus restore the
fishing to its former state by enabling the spawn
of the predatory fish inhabiting this water to
propagate and multiply.
