One Green Ridge Road  
Pittsford, N.Y. 14534

Dear Bob,

I am attaching copies of my letter to the Department of Environmental Conservation and their reply dated April 2nd.

It looks as though Eagle Lake has, so far, escaped the evil effects of acid rain and I thought you would be interested in reading the results of the department's survey.

Your letter of October 30th about the "good" algae is most interesting. When I get to the lake this summer I'll check into the idea of installing a ceramic filter on the intake valve of the hose that draws from the lake.

In your letter you mention the names and addresses of the people on our side of the lake. Since we are on the island, I'm not quite sure where you mean. If you are referring to the cottages on the part of the lake that is West of the viaduct the only names I know are the Stantons near the bridge and Fred Martin who has the cottage nearest to the outlet. His address should be in the membership list as should be the Stanton's. The others I don't know.

We are hoping to be able to be at the lake for about four weeks starting the middle of July, so perhaps we can have some conversations during that time - at least at the annual meeting.

Sincerely,

Alfred E. Runge
